

# Harp Pedals Script

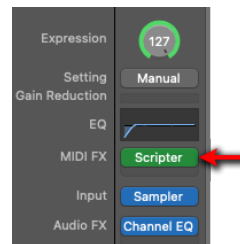

Thank you for downloading the Harp Pedals script from MagicFox! This script emulates harp pedals by remapping natural notes (white keys) for more accurate and authentic harp glissandos played manually.

## License

This script is distributed exclusively by MagicFox Theatrical for non-commercial use only. It may not be sold, included in a rental package, or used in any compensated or paid programming. Please contact us to inquire about purchasing a commercial license.

## Installation

1. Move “MFT Harp Pedals NC.pst” to (your username)/Music/Audio Music Apps/Plug-In Settings/Scripter
2. Click the **MIDI FX** button on a channel strip (e.g., a harp channel strip) and choose **Scripter**. The Scripter plug-in will open.

3. Click on the drop-down menu (“Factory Default”) choose the Harp Pedals script.

## Additional Support
